DATA CENTERS & COLOCATION SERVICES

Scale and Transform IT Infrastructure

It's time to find a new data center. Secure, connected data center and colocation solutions at the edge of the internet await you, customized to meet your current needs and future goals.

Your Enterprise Data Centers Are Ready

Business requires secure, resilient and agile IT infrastructure. But it's expensive to build and staff a data center facility, so most IT environments are moving off-premises.

You must keep up with business growth and new technologies, while minimizing risk and costs. Seamless experiences across private, multitenant, managed hyperscale, and hybrid clouds require expertise that is hard to find.

Get the Data Center Resources You Need, Anytime

Small businesses to Fortune 500 enterprises choose TierPoint data centers for enterprise-class reliability, performance and security, without the risk and overhead of an on-premises data center.

With TierPoint, you can:

- Meet your resiliency objectives
- Maximize physical and cyber security
- Scale IT infrastructure as your business grows
- Get help from compliance experts

- Access the best network connectivity
- Outsource installation and maintenance tasks
- Optimize data center locations
- Blend colocation, cloud and managed services

Maximize Availability and Scale

With one of the largest and most geographically diversified footprints in the U.S., TierPoint operates more than 40 data centers across the nation with industry-leading service levels (SLAs) up to 100% uptime.

Improve Security and Compliance

Security is our top priority. We offer comprehensive physical security including 24x7 on-site personnel, biometric access screening and full-building video capture. All our data centers are HIPAA, PCI-DSS, GLBA, and SSAE 18 compliant.
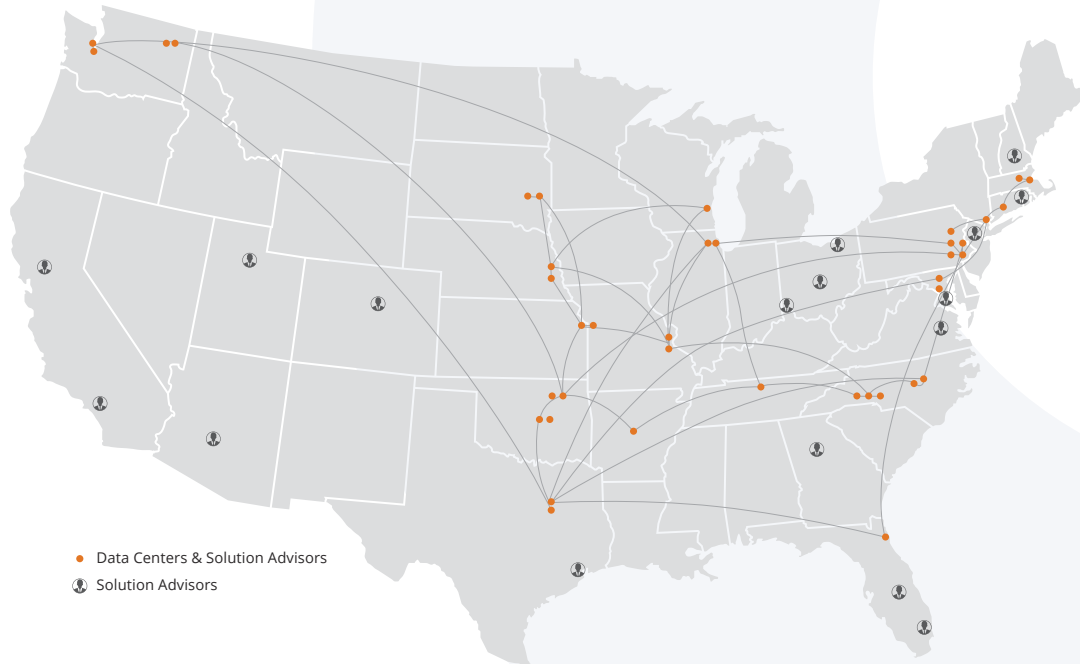

Enhance Performance and Connectivity

Our carrier-neutral data centers provide high-bandwidth, low-latency connectivity from a variety of carriers to meet your business needs. Additionally, our network – connecting our extensive footprint of data centers – brings the internet closer to you with guaranteed exceptional performance and reliability.

Choose Secure and Flexible Colocation

You need a secure and modern data center in which to operate your IT equipment, but it's expensive to build and staff your own facility. Using a colocation data center can give your business a competitive advantage. Each TierPoint facility aligns with client capacity and space requirements by combining customizable cabinets, cages, and suites in raised floor environments with high power and cooling density ensuring maximum expansion for IT infrastructure for the given footprint.

State-of-the-Art Data Centers Connected Coast-to-Coast

See what's possible at one of our world-class data centers.
