

The web conferencing solution with no pins or pens

A little face to face makes all the difference. With Dialpad Meetings, connect with colleagues or clients with HD quality video or audio conferencing plus screen sharing for added context to every meeting.

The world's easiest conferencing solution

Look who's talking

Be seen & heard with HD video streams plus clear indicators of who's talking and who's not.

Collaborate from anywhere

With one click, easily share your screen, application, or tab to collaborate live.

No more note-taking

With built in Ai that'll capture meeting notes for you, you're never left asking "can you say that again?"

Look who's talking

- HD quality video streams for organizers and participants
- Visual indicators of active speaker on participant card
- Pin organizer video to ensure everyone stays focused where they should be

Collaborate from anywhere

- No pins or downloads that get in the way of joining
- Native calendar integrations with Google, Microsoft, and Slack for easy one-click access
- Share your screen to add context to every meeting

No more note-taking

- Automatically captures meeting notes including speaker separation and highlighted action items (via Voice Intelligence™)
- Share post-meeting summary notes with participants via share link or through integrations with Microsoft or Slack

The new UC Video interface is "best in class". We have been able to replace all our conferencing technologies with Dialpad Meetings.
