

## Open Seating

Evolve IP helps businesses offer greater flexibility and mobility to their workforce by allowing users to log into any phone available in your office. Users can turn any phone into their primary personal work phone. This maximizes workspace environment and increases productivity.

*By the end of 2020, nearly 72.3% of the total U.S workforce will be mobile; maximize your resources with an open seating design along with mobility applications\**

\*U.S Mobile Worker Population Forecast, 2016-2020, IDC

### The Mobile Workforce

The drastic rise in a mobile workforce is driving businesses to adopt technologies that allow them to support a flexible work environment. Evolve IP's Open Seating service allows users to maintain a seamless communication experience and enhance productivity when they are telecommuting between multiple office locations.

### Why Open Seating?

Open Seating offers unique features that help businesses deliver a collaborative work experience. Unlike a traditional hoteling feature, Open Seating allows an available phone to be configured with a user's phone preferences and settings for speed dial buttons, line keys and soft keys by simply logging into the phone with your voice mail password.

The Open Seating service is a great fit for call centers, real estate agencies, banks, car dealerships, educational institutions, non-profit organizations and all industries that are looking to maximize workspace environment, increase efficiency and reduce costs.

### Evolve IP's Open Seating Benefits:

Here are some benefits of an Open Seating environment:

- **Minimize overheads and required resources:** Open Seating allows shared workstations, thereby reducing the need for additional infrastructure (e.g. phones, LAN, system, furniture) and other resources (such as IT, etc.) associated with a permanent workstation. It further reduces real estate overhead by allocating workspace efficiently.
- **Reduce costs:** Reduction in the number of handsets required reduces expenses - both CAPEX and OPEX.
- **Improve Communication and Employee Satisfaction:** Ability to be available when commuting between offices helps improve communication and employee satisfaction.
- **Increase Talent Acquisition and Retention:** Provides greater flexibility to employees to work from anywhere, thereby increasing employee satisfaction, talent acquisition and retention.
