Cybersecurity Bundle

Best-In-Class Security Products

Thrive's Cybersecurity Bundle leverages best-in-class technologies to deliver a holistic end user security solution that helps prevent against ransomware, data exfiltration, and social engineering attacks.

With the recent increased shift to a remote workforce, ensuring endpoint and end user security becomes more challenging and requires a multi-layered approach. Thrive's Cybersecurity Bundle addresses these challenges to provide protection against these threats to your end users and organization:

- Malware
- Social Engineering
- Phishing
- Ransomware

People are the weakest link in the security chain and human error is the leading cause of data breaches. As attacks become more widespread and sophisticated, end user protection and education are key security measures that can mitigate against costly data breaches that result in monetary loss, loss of productivity, and brand damage.

- **81%** of all breaches come in from end users
- The average time it takes for a company to recognize a data breach is **206** days
- It's estimated that a ransomware attack occurs every **11** seconds
- **91%** of all attacks launch aim at end users through a phishing attempt
